Caring for Kids

October 6, 2020

Dear Parents,

We hope this letter finds you and your family in good health. The Caring for Kids program has some important updates regarding the program's operation and continued ability to deliver dental care for your children in their schools.

Our priority is to offer optimal dental care to school-age children in as safe a manner as possible. During the school year, our program provides children with preventive and simple restorative dental treatment (dental exams, cleanings, sealants, fluoride treatment, and minor fillings.)

Unfortunately, due to the pandemic, the program will not be operating in schools this first semester and possibly for the remainder of the academic year.

However, if you would like your child to continue receiving dental care, our experienced general dentists can treat them at our health center with sites located in Fitchburg, Gardner and Leominster.

In an effort to make this process as simple and streamlined as possible, we have also set up a dedicated phone line for parents seeking dental care for their children. Please call Heather Torres at (978) 878-8389 to make an appointment for your child.

Thank you for entrusting us with your child's oral health and we look forward to seeing them again.

Sincerely,

Caring for Kids
